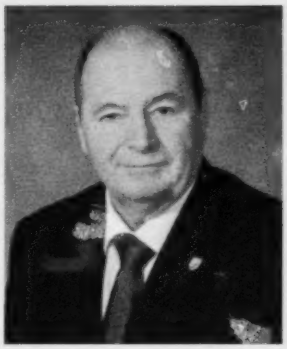
Welcome to the 2015 Annual Statistical Review



The Annual Statistical Review is one of the most important documents produced by the government of Prince Edward Island.

This annual snapshot of our province helps government make important policy decisions. Since it is a comprehensive overview of our economy, population, and social composition, it is a valuable tool to help determine where – and when – programs and services are needed.

There are many interesting facts found in the more than 100 data tables, including details of our province's economic performance in 2015. These tables give us current and historic socio-economic information about Prince Edward Island.

The information is compiled from a variety of sources, including provincial government departments, the private sector, and Statistics Canada. The return of the mandatory long-form census in 2016 will help to make the Statistics Canada information – and by extension, our Annual Statistical Review – even more accurate and complete next year.

I would like to personally thank the staff of our Statistics Bureau for their hard work and diligence in gathering the information for this year's document. All statistics have references to their original source, and I encourage you to consult them – you can also visit *www.gov.pe.ca/finance/statistics* for current statistical information online.

If you have any suggestions, comments or statistical inquiries, please contact the staff of the Prince Edward Island Statistics Bureau at (902) 368-4030.

A Historical Note

Before the European explorations, Prince Edward Island was frequently used by the Mi'kmaq People for fishing, hunting and some planting. The Mi'kmaq called the island *Epekwitk*, meaning "cradle on the waves." Europeans later changed the pronunciation of the name to *Abegweit*. Historians credit the European discovery of the Island to Jacques Cartier, the French navigator, who claimed the Island for Francis I, King of France, on July 1, 1534. In 1720 the Island, then called *Île Saint Jean*, was colonized by 300 French settlers, sponsored by a commercial company of the Comte de Saint Pierre. The Island was ceded to Great Britain in 1763. Two years later the designated capital city of the *Island of St. John* took on the name *Charlotte Town* in honour of Queen Charlotte, wife of King George III of England. In 1799 the colony was renamed Prince Edward Island in honour of Edward, Duke of Kent, who was then commander of the British forces in North America. Prince Edward Island is known as the "Cradle of Confederation", because the Charlottetown Conference, held there in 1864, initiated the movement toward Canada's federation. The Island became a province in 1873.

The Armorial Bearings[1] of the Province of Prince Edward Island, shown above, were proclaimed to come into force on December 13, 2002. The centrepiece is the Shield of Arms, granted by King Edward VII in 1905, featuring the English heraldic lion, a large oak tree on the right and three young saplings on the left. The mature tree originally represented England, while the three saplings stand for the three counties - Kings, Queens and Prince. Scrolled along the bottom of the Shield of Arms are the Latin words *Parva Sub Ingenti*, which, when translated, read: *The small under the protection of the great*. The surrounding elements of the Armorial Bearings illustrate significant characteristics of the province, its position in the Canadian federation, its founding peoples and its natural resources.

1 Description of the Armorial Bearings on this page, and the provincial flag and bird on the following pages, is adapted from the government publication *The Symbols of Prince Edward Island*.

During the 1977 session of the PEI Legislative Assembly, the Blue Jay was officially named the provincial bird. It was chosen after a province-wide public vote held during Environment Week in 1976. Winter is the ideal time for sighting the Blue Jay, its shrill cries cutting the silence of the crisp winter air.

Samuel Holland's Survey of the Island of St. John
Captain Samuel J. Holland surveyed and mapped Prince Edward Island, then known as the Island of St. John, between 1764 and 1766. During the survey, Holland used innovative instruments such as the astronomical clock and the refracting telescope. His work was so accurate that many of the boundaries for lots and parishes he mapped are still used today. (Image: National Library and Archives Canada).

GDP Income and Expenditure tables for 2015 are expected to be released by Statistics Canada in the fall of 2016. Statistics Canada estimates that real GDP growth for PEI in 2014 was 1.5 per cent, compared to 2.5 per cent national growth for 2014. Exports decreased by 0.1 per cent. Real gross domestic product growth was revised up for 2012 to 1.2 per cent and for 2013 to 2.0 per cent.

The change in the *All-Items Consumer Price Index* (CPI) for Prince Edward Island was -0.6 per cent in 2015. Following one quarter of zero growth in the first quarter of 2012, the Canadian economy had seen 11 consecutive quarters of growth leading up to 2015. In 2015, a lower valued Canadian dollar and lower prices for commodities weakened the economic situation nationally. As a result of the fall in commodity prices and it's effects on the broader economy, real GDP growth was 1.2 per cent, the slowest rate of growth since 2009. Through 2015, goods production declined by 1.6 per cent, with declines in mining and construction. Manufacturing saw modest growth in 2015, at 0.2 per cent. The service sector grew 2.0 per cent in 2015, led by real estate, rental and leasing, finance and insurance, retail trade, and transportation and warehousing.

After peaking in 2010 at 9.6 per cent, the unemployment rate in the United States has declined every year since. In December of 2015, the United States Federal Reserve increased the federal funds rate to between ¼ and ½ percent. Changes in business industrial classification strategies used by Statistics Canada's Business Register over the past year have created increases in the number of active businesses shown by the Canadian Business Patterns. As a result, these data do not only represent changes in the business population over time. Statistics Canada advises users to not use these data as a time series.

The locations in the "indeterminate" category do not maintain an employee payroll, but may have a workforce which consists of contracted workers, family members or business owners.

Results of the Canadian Income Survey should not be compared to those produced by the Survey of Labour and Income Dynamics or other previous income surveys.

Before-tax low income cut-offs (1992 base) were determined from an analysis of the 1992 Family Expenditure Survey data. These income limits were selected on the basis that families with incomes below these limits usually spent 54.7% or more of their income on food, shelter and clothing. Low income cut-offs were differentiated by community size of residence and family size.

The Market Basket Measure (MBM) attempts to measure a standard of living that is a compromise between subsistence and social inclusion. It also reflects differences in living costs across regions. The MBM represents the cost of a basket that includes: a nutritious diet, clothing and footwear, shelter, transportation, and other necessary goods and services (such as personal care items or household supplies). The cost of the basket is compared to disposable income for each family to determine low income rates.

Low income measures (LIMs), are relative measures of low income, set at 50% of adjusted median household income. These measures are categorized according to the number of persons present in the household, reflecting the economies of scale inherent in household size.

Notes: *Private Individuals and Others* includes credit owed to: supply and finance companies, dealers, stores, private individuals and other unclassified credit sources.

For those institutions providing data based on fiscal year ending March 31, the debt outstanding at that time is used to represent the debt at December 31 of the previous year.

Advance Payments Programs were taken out of the cash receipts estimates from 1971 to date and moved to the debt outstanding series. These payments are a type of loan made to farmers since no transaction occurs at the time of the advance. Estimates are derived from data supplied by the Canadian Wheat Board and Agriculture Canada.
